

Xu Xiao

Full-Stack Software Engineer

(646) 858-8165 | xiaoxu0630@gmail.com

EDUCATION

Boston University

Master of Science in Software Development, 2025

Relevant Coursework: Data Structures & Algorithms; Advanced Programming Techniques; Software Design & Patterns; Frontend & Server-Side Web Development; Database Design & Implementation; Information Systems Analysis & Design

The City College of New York (CCNY)

Bachelor of Arts in Economics, 2023

PROJECTS

LandingPoint | Full-stack city discovery and relocation platform

Next.js, React, TypeScript, Tailwind CSS, Supabase, PostgreSQL, Row Level Security

Live Demo: landing-point.vercel.app | **GitHub:** github.com/xuxiao321/LandingPoint

- Built and deployed a city-matching web application that ranks destinations from user budget, goals, and weighted lifestyle priorities across a growing city catalog.
- Designed source-backed city profiles with population, monthly living-cost estimates, connectivity, events, and resident reviews.
- Implemented Supabase authentication, persistent saved cities and preferences, public reviews, and database access policies using Row Level Security.
- Created data validation and production checks for city data, ranking behavior, account flows, and deployable Next.js builds.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, SQL

Frameworks and tools: Next.js, React, Tailwind CSS, Supabase, PostgreSQL, Git, Vercel

Developer productivity: OpenAI Codex; AI-assisted debugging, testing, and documentation

Focus: Full-stack web development, data-informed product design, authentication and database security
